

How to use the CI PLUS Production Kit

Stream download

Use the CI PLUS CAM from the Production Kit, please download one of the following streams:

ftp://ftp.bsk.com.tw/bsk/fta_scrambled_DVB.trp

Process

In order to test your host (TV, STB), you have to do the following actions:

Run the stream “fta_scrambled_DVB.trp”

Turn the host ON without any CAM

Go to the channel “SCRAMBLED”

Plug the CAM **(no smart card is needed)**

Test Result

As soon as the CAM is inserted, it starts CI+ authentication and looks for every resource the host declares.

If test is OK(PASS):

A popup which tells result “**PASS**” appears AND descrambling starts.

If test is KO(Fail):

A popup which tells result “**KO**” appears OR descrambling does not start.
